Smart Charging
Management Platform

On-schedule and **low-cost** vehicle charging

The Cleo platform reduces charging costs and facilitates the work of electric vehicle fleet operators, providing greater control over the quality, safety and availability of the charging service.

Automate your charging operations

Interconnection and interoperability

Integrate our platform into your IT ecosystem. Since its designed to be compatible with most solutions on the market (terminals, vehicles, telematics), it evolves with your infrastructure.

Remote control of charging stations

Easily track the real-time power delivery of your charging stations and monitor the charging status of your vehicles from the comfort of your office or with your mobile phone.

Centralize your needs

Monitor your vehicles, sites and charging stations from a single dashboard, 24 hours a day.

Smart charging and scheduling

Access automated charging schedules customized to your vehicles' usage patterns, incorporating departure and return times as well as the distance required for their journeys.

Alerts and notifications

Enhance operational efficiency by promptly addressing any unforeseen charging interruptions through immediate notifications.

Reduce costs

Maximize cost savings with a platform that minimizes power demand and operating expenses by generating customized charging plans tailored to your entire fleet.

Analyses and reports

View your charging session history and get detailed reports on the power delivered to your vehicles.

Continuous improvement

Leverage the power of top-tier features thanks to our scalable, continuously updated platform designed to meet the operational needs of electric vehicle fleet managers.

Your Cleo plan, your way!

Manage, optimize, and automate your fleet charging with features tailored to your goals and fleet maturity. Cleo helps you take control: **Choose the plan that drives you forward.**

Essential

Kickstart Your EV Journey with Confidence.

Designed for operators taking their first steps into electrification, this plan gives you effortless control over your charging stations, while keeping your daily operations smooth, reliable, and stress-free.

Pro

Power Up Your Fleet with Telematics-Driven Charging.

Built for precision-driven operators, it streamlines fleet management with integrated telematics. Cleo optimizes charging, lowers costs, and enhances performance so your fleet runs smarter and faster.

Pro +

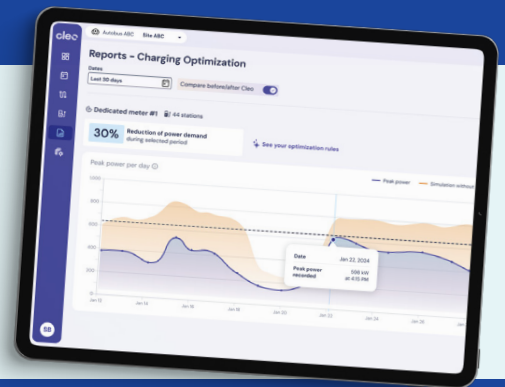

AI-Powered Charging, Tailored to Every Vehicle.

Cleo's advanced AI adapts charging to each vehicle's route and weather conditions, continuously optimizing energy use. This plan includes demand response programs* for stronger ROI and smarter energy management.

Only with Cleo ✨

AI That Drives Maximum Savings

At Cleo, AI isn't just a buzzword. Our proprietary algorithm learns vehicle routes, anticipates energy needs, and removes operational friction, keeping your fleet ready to roll with unmatched energy efficiency and no manual input required.

Powerful add-ons

Demand response Management*

Cleo automatically shifts or reduce energy use during peak events and save on your electricity bill.

Carbon Units Monetization**

Earn money from your electric fleet with Cleo's turnkey carbon credit monetization program designed to maximize the value of your sustainability efforts.

* Subject to availability of programs offered by your local energy provider(s).
** Currently available exclusively to Cleo customers in Canada.

The Cleo team is a strategic partner in the success of our energy transition. They've helped make our operations both efficient and resilient, all while minimizing financial risks. Their smart charging management solution also outperforms anything else on the market.

**Jean-François Brossard, Director
Location Brossard**

We needed a partner to support us through our energy transition. We chose Cleo for their expertise. Their electrification specialists helped us strengthen the reliability of our operations and fully optimize our fleet charging. Cleo has been an outstanding partner : always available, always attentive.

**Stéphane Boisvert, President
Autobus Groupe Séguin**

The Cleo platform addresses many of the common challenges faced by fleet managers. It's easy to identify issues like charger errors or unplugged vehicles and alert the charging operation promptly, while also providing carriers with accurate SOC and readiness estimates. The historical data supports better planning by highlighting charging patterns and peak demand times. Overall, the platform is intuitive and user-friendly. I highly recommend it to fleet managers and dispatchers looking to optimize their electric fleet operations.

**Nikko Wang - Manager, Projects
Alberta Motor Transport Association (AMTA)**
